

Portaltech Reply is a market-leading provider of eCommerce implementation and MultiChannel consulting services with offices in London and Milan. Our eCommerce expertise and experience has developed since inception in 2000 and we have been responsible for some of Europe's largest and most successful eCommerce and MultiChannel retailing projects. We are 100% dedicated to hybris technology and are one of world's most experienced and respected implementation partners with Platinum Elite status. Our hybris customers include TUI, LK Bennett, Long Tall Sally, Office Shoes, H3G, O2, Bunzl Group, Thompson & Morgan and the Daily Mail group.

INDUSTRIAL YEAR PLACEMENT

Portaltech Reply offer industrial placements for students on a 'sandwich course'. Our aim is to give you maximum exposure to 'real' work and we believe the best way to do this is to assign you to one of our project teams. Here you will be a genuine member of the team, working closely with our experienced consultants to design, develop and deliver enterprise strength web applications for our clients. The work is challenging in more ways than one, so while we expect you to have an excellent academic track record (typically 320 UCAS points and a 2:1 minimum expected in Computer Science or a related numerical discipline) we are also interested in your achievements and experiences outside the classroom.

If you decide to apply and are accepted onto the placement, we will encourage you to take on responsibility, particularly if you show ability and a willingness to learn. Our aim is to train you both technically and professionally so that you can take away with you new skills and experiences and maybe even an offer of a permanent role. And of course, all of this hard work does not go unrewarded. We are offering £20,000.00 per annum.

CORE COMPETENCIES

- Sandwich course student with 320 UCAS points and a 2:1 minimum expected in Computer Science or a related numerical discipline;
- Strong analytical and problem solving skills;
- The ability to work on challenging assignments on your own without direct supervision;
- Excellent interpersonal skills. As comfortable in front of the client as a computer;
- Right of abode to live and work in the United Kingdom, without restriction.
- Demonstration of interest and delivery in eCommerce advantageous.

TECHNICAL COMPETENCIES

- Evidence of excellent results in Java programming courses (or a similar object-oriented development language);
- Experience with and ability to demonstrate knowledge of: Relational database concepts, SQL, software development strategies, web applications;
- Comfortable using Windows operating system (UNIX/Linux also an advantage);
- Experience in any of the following would also be an advantage: web design (HTML, css, Javascript), PHP, JSP, Java Beans, Servlets, EJB, distributed computing, J2EE, Websphere, Weblogic, PERL, shell scripting.
