Outline Requirements

You must have above all a passion and enthusiasm for programming.

This is an industrial placement where the incumbent will be working on real “live” commercial projects, with maximum development time actually on the projects, they are expected to work responsibly under the guidance for his/her manager, undertaking all tasks with drive and desire to contribute to an excellent solution.

We actively encourage ownership and he/she will be given guidance and encouragement to develop by their own endeavours, with advice from the team.

Main Purpose of the Post

1. Working with in-house designers and developers to create browser based software/applications using object orientated programming techniques.
2. Using web technologies including PHP, SQL, HTML, CSS and JavaScript with consideration for cross browser support, accessibility and government standards
3. The potential opportunity to work with mobile apps

General Duties

1. To provide assistance to team members as required
2. Undertake specific projects effectively and within agreed timescales
3. To liaise and support team colleagues to ensure the effective operation of all elements of the business
4. To carry out this role giving due regard to health and safety issues and policies of the company
5. Observe and practice the company's policies on confidentiality
6. This is intended as a guide to the principle duties and responsibilities of the post and as such will be subject to periodic review in consultation with the post holder. The post holder may be required from time to time to undertake comparable duties not specifically mentioned in the job description as directed by the management.

7. Take turns to make the coffee!
