

TeachFirst

Insight Programme

Manchester | London | Leeds
26 March - 4 April
including Saturday 29 March

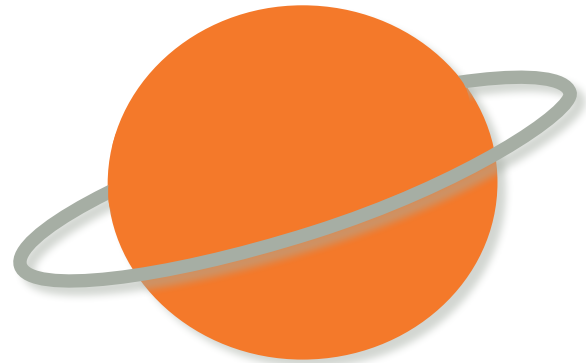

Additional dates in September to be released soon

The Insight Programme - Help us address the STEM challenge in schools

With insufficient numbers of STEM (Science, Technology, Engineering & Maths) graduates for the needs of both higher education and employment, a seemingly self-perpetuating cycle has been established, with too few scientists and mathematicians being produced to help inspire and educate the next generations.*

Teach First is committed to addressing the shortage of Science and Maths teachers by recruiting more graduates to teach in schools in challenging circumstances.

$$\int \frac{1}{x} dx = \ln x + c$$

TeachFirst

Applications open 9 December
teachfirst.org.uk/insight

Our Insight programme is just that, it's an opportunity for penultimate year students to gain a unique insight into our Leadership Development Programme (LDP). You will gain valuable work experience as well as the chance to inspire the next generation by taking your passion for science, technology, engineering or maths back into the classroom.

As an Insight participant, you will gain an insight into education in a Teach First partner school, as well as immersing yourself in life and work at Teach First.

How will you benefit?

- Opportunity to be part of a movement that is changing lives
- Develop skills that will help you progress onto the LDP
- Gain an insight into the role of a STEM teacher
- Access to professional development and a network of supporters
- Inspire a class in your specialist STEM subject

Selection Criteria

Studying for a STEM degree or have A-levels (A*-B) in one of the following subjects – Maths, ICT, DT or two of the following subjects; Biology, Chemistry and Physics
