Velindre NHS Trust

NHS Wales Informatics Service – Operational Services Directorate

Trainee Software Developers

Salary: £18,838 to £27,901 [Dependent on skills and experience]

Hours: 37.5hrs per week

Location: Cardiff, South Wales

NWIS is responsible for the design, deployment and management of national Information, Communication & Technology (ICT) systems within NHS Wales and provides a range of services to the Welsh Government and NHS Organisations. The organisation is also responsible for setting the standard for health informatics professional development.

We are looking to appoint entry level developers to join a busy department that develops and supports many of the national computing systems within the NHS in Wales.

We are looking for candidates with an interest in forging a career as a trainee software developer. However the role is varied and offers the successful candidate the opportunity to cut their teeth and develop skills in support, business analysis and testing.

You should have a strong interest in building high quality software using Microsoft technologies. In particularly we are looking for candidates who can demonstrate proven experience in either a professional or academic environment using:-

- C# or Visual Basic.NET
- Windows Forms or ASP.NET
- SQL Server or Oracle RDBMS

The ideal candidate will also have a keen interest in developing their skills in the following areas:-

- Visual Studio and Team Foundation Server.
- Test driven development
- ASP.NET MVC and the latest Microsoft .NET technologies.
- Integration using BizTalk, WCF and other messaging technologies.
- Systems development using Intersystem's Cache in Cache Object Script, Cache Server Pages (CSP) and Cache classes

The successful candidate shall join our National Applications teams developing and supporting any one of a number of new initiatives. You may find yourself building mobile apps or undertaking development using Cache Server Pages and Cache classes for our Hospital Pharmacy team. Alternatively you could be writing ASP.NET websites, WCF Services or BizTalk orchestrations supporting Pathology messaging to Patient Administration and GP systems.

Above all we want hardworking and adaptable people who can quickly learn our systems and help us successfully build and run complex technical software applications. In return we offer a varied role working as part of a large software development pool with a structured development programme, personal development plan and excellent career prospects.

This is an excellent opportunity for someone looking to begin their career in Information Management & Technology.

If you would like to discuss these vacancies please contact Geoff Norton, Software Development Manager, 029 2050 2053 or email Geoff.Norton@wales.nhs.uk

Closing Date: 14.02.2014

Interviews: To be held in February and March 2014

Please note a technical test will form part of the assessment process
