Graduate Software Developer – Start Date July 2015

We are looking for Graduates with a software design related degree - ITMB, Computer Science or Software Engineering. You will be a high achiever with a minimum 2:1 degree, good communication skills and be passionate about making a difference. We are looking for individuals with a proven flair for programming and an enthusiasm for keeping pace with technology.

"One of the best things about working here is the close team relationship; everyone's opinion is valued and taken into consideration" – **Lighthouse Systems Graduate**

Requirements:
- Sound understanding of database coding, especially writing SQL. An understanding of stored procedure development would be advantageous but not essential
- Placement or working experience of C#, Vb.Net ideally, although demonstrated Java or C++ experience would be considered
- Understanding of HTML and CSS
- A sound understanding of unit testing is desirable but not essential
- Excellent team work

Role:
- Writing stored procedures for both Oracle and SQL Server
- Writing SQL to implement complex reports
- Using C# to develop the Shopfloor-Online application suite
- Writing jQuery based javascript client code

At Lighthouse we operate an Agile development process and we are pursuing a SCRUM methodology to help us manage our fast moving development projects efficiently. The development team work closely together to produce a focused, motivated and ambitious unit. If you would like to stretch yourself in a challenging development environment working to ambitious timescales with a definite sense of product attachment and achievement, then we would like to meet you.

Your Perfect Partner

Lighthouse Systems is one of the world's leading suppliers of Manufacturing Execution Systems. We work with some of the biggest names in manufacturing, such as Toyota, Nissan, Volvo, Airbus, KP Snacks, Crown and Rexam.

Our Web-based Manufacturing Execution Systems (MES) application – Shopfloor-Online – is a configurable solution that helps manufacturing companies achieve measurable improvements in efficiency, output, compliance, quality and customer satisfaction. It provides integrated real-time information from across the entire manufacturing environment.

Our team of Project Engineers and Developers are based at our Head Office in West Sussex and we have offices in the USA, Singapore and France. Due to the location of our Head Office a car is essential.

Benefits:
- **Competitive salary**
- **Non-contributory pension**
- **Relocation Package**
- **Laptop**
- **Free car parking**
- **Lunch provided**

Lighthouse Systems is perfectly situated between Brighton and London; giving you access to a relaxed cultural city on the coast, and the ever exciting UK Capital, for shopping and nightlife.
