

Undergraduate Software Developer

Do you want to solve really hard problems using cutting-edge web technologies with a team of smart people?

Do you want to work for a company where you'll be challenged; where you can learn from your peers and mentors, and where you'll be pushed to go outside your comfort zone?

If yes, then Blurr is for you.

An example scenario would be:

Having just finished a conference call with one of our broadcasting clients, our CTO has asked to go through some ideas for a new feature - profiling the clients Twitter audience. You'll be expected to contribute ideas, assist in the design and develop the technical and user features to produce a working proof of concept.

You'll have the responsibility of getting the job done. You'll work with other members of the team on UX graphics, language analysts, the CTO before presenting a working concept to the MD. After a successful proof of concept you may have the opportunity to present the features to the client and take ownership of that part of Blurr.

Ajax

JSON

Knowledge of social networks

Based in Cwmbran, 10 minutes from Newport, Blurr is a leader in real-time Twitter analytics. Our software platform enables users to get instant audience reactions from Twitter. Blurr enabled LBC to be the first in the UK to broadcast live Twitter sentiment of a political debate. Our 'Twitter Worm' has since been used by the Sun newspaper for the Scottish Referendum debates.

We make whizzy things like Twitter Worms, Twitter Polls and Twitter Wordles from capturing and analysing live data. Alternatively, users can delve into their historical data for in depth audience insights. Our sophisticated approach to language analysis means our clients get accurate insights into how Twitter audiences feel.

Blurr is an early stage tech company that is currently punching above its weight. We think we're on the cusp of something really interesting. We'd like you to come and be a part of that bright future.

Please email miles@blurr.co.uk your CV and a covering letter
