Love Linux?

TIGER COMPUTING
Linux for Business
The UK's Leading Linux Support Provider Since 2002

Tiger Computing, the UK's leading Linux support provider since 2002, is offering an Industrial Year placement.

What you'll be doing

Setting up Linux systems, researching how to solve Linux problems, writing up technical notes, assisting Linux consultants with their work, managing Linux systems. How deep will the work go? Just a little deeper than you're comfortable with.

What you'll get

The opportunity to work with some of the best Linux people around. Practical experience of Linux in a commercial environment. Real coffee. Oh, and we'll pay you £18K.

What you need

Some experience of Linux. Grey matter. Sense of humour. Passion. Good written English.

How to apply

Send a CV and a covering letter explaining why you would relish the opportunity to work at Tiger Computing for a year to kae@tiger-computing.co.uk by 1 June 2015.

About You:

- You love the idea of **being paid to work on Linux**.
- You have a good understanding of IT, and you're **keen to learn more**.
- You're **smart**, clear thinking, proactive.
- You **Get Stuff Done**.
- You're able to speak and write articulately. We're not looking for the next Dickens, but you do need **good communications skills**.

About Us:

- We provide Linux Support and Consultancy services to businesses throughout the UK.
- Our clients are mid size businesses that rely on Linux.
- We make sure that their Linux servers work well, reliably, securely and consistently.
- We advise them how best to solve their business problems with Linux
- We're based in the (beautiful) Forest of Dean

The small print

This is a one year contract. Dates are flexible, but likely starting date is in June or July. You will need your own transport: our office is not reachable by public transport. More info: www.tiger-computing.co.uk.
