

Codel Software Ltd

Job Description – January 2016

Innovative software house specialising in Business to Business Internet, Extranet and Intranet software applications has a vacancy for a software developer on industry placement.

Our clients include SMEs, blue chip national and multinationals. The candidate should have a basic knowledge of Microsoft .Net, VB.Net, SQL, C#, HTML, XML and JavaScript. The candidate will be expected to work on external client projects as well as the continuous development of the company's innovative Software-as-a-Service HR applications.

The candidate is expected to achieve an IT software degree of 2:2 minimum, be self-motivated, be able to fit seamlessly into and maintain the high standards of the existing team and demonstrate maturity and integrity. In return the company offers a rewarding working environment, continuous training and a salary based on performance and skills attainment.

Interested applicants should send their CV preferably by email for the attention of:-

Adrian Lewis, Commercial Director (adrian.lewis@codelsoftware.com)
