challenging + leading-edge + fun = INTERGRAL
information solutions

Who are Intergral…?

We are located close to Stuttgart, Germany and are an established global provider of application monitoring and analysis tools with over 15,000 products sold to customers around the world. Our products reflect our technical expertise, high focus on usability, commitment to quality and complete attention to detail.
http://www.fusion-reactor.com

What is our passion…?

We are passionate about building the best possible products in the Application Performance Monitoring (APM) space ! Our mission is to make developers and DevOps lives easier, by making their web applications run better, with higher quality and to keep servers responding when things go bad.

We really care about what we build and we believe that this shows through in our products and will make us into one of the leading global providers of APM solutions.

Are you up for it…?

If you are a budding software engineer who has not only achieved excellent grades but who has enthusiasm, commitment and total customer focus, then Intergral has an environment where you can demonstrate your skills and build solutions which really make a difference.

Intergral are looking for 6 highly motivated and technically strong computing students who want the challenge of being part of a team who build 'real' products which are being used by 1000's of customers every day!

Working in Germany – opportunity of a lifetime!

Being able to experience a year working and living in Germany, as past students have told us, is a once in a life time opportunity that allows you to expand your horizons and see what life is like on continental Europe.

Intergral will arrange your accommodation before you arrive and assist you in setting up a bank account and other registration tasks.

The working language in the office is ENGLISH ☺
