Codel Software Ltd
Industry Placement Job Description – July 2016

A leading Software Development company based in Bridgend, South Wales that specialises in web, cloud and mobile software applications has an immediate vacancy for an IT related undergraduate degree 'industry placement'as a software developer for the period 2016 to 2017.

Clients include local, national and international SMEs, blue chip national and multi-national organisations. The chosen candidate should have a strong technical background and basic knowledge of Microsoft .Net, VB.Net, SQL, C#, HTML, XML and JavaScript. The successful candidate after an initial probation period will work on external client development / support projects as well as the continuous development of the company's innovative 'Activ People HR' Cloud Software-as-a-Service applications.

The candidate is expected to be self-motivated, be able to fit seamlessly into and maintain the high standards of the existing team and demonstrate maturity and integrity. In return the company offers a rewarding working environment, continuous on-the-job training and a salary based on performance and skills attainment.

Interested applicants should initially send their CV preferably by email for the attention of: -

Adrian Lewis, Commercial Director (adrian.lewis@codelsoftware.com)
