

Better medicines bring a brighter future.
Could you help us create it ?

1 Year – R & D Software Development Placement 2017-2018

AstraZeneca, one of the world's leading pharmaceutical companies is offering several one-year undergraduate industrial trainee placements within the Research and Development Information (RDI) function based in Cambridge.

RDI is a critical enabler for our scientists and this is your opportunity to support this by undertaking projects in agile application development and/or working on high profile, long term projects. You will be exposed to, and expected to adhere to, internal development lifecycle standards and will use tools such as Java, C#, Python, JavaScript, XML, JSON, HTML 5, CSS, Angular JS, NoSQL, SQL as well as the opportunity to work with industry standard software.

Your aim will be to help us meet the scientific, technical and medical information needs of our drug-hunting projects. You should have practical experience in developing software and have a keen interest in understanding the science behind the drug discovery process.

Ideally candidates will be in their second year of study of an undergraduate degree on track to achieve a 2:1 or 1st in Computer Science, Bioinformatics, Medical Informatics or a similar discipline.

To find out more and to apply, visit ERMORDI17

Closing date for receipt of applications: **20th of December 2016**

If successful you will be hired by HAYS and working at AstraZeneca.
