

Software Development Intern

Job Role

We have an exciting opportunity for a software development intern to join our successful, growing team in our offices at Malvern Hills Science Park, Worcestershire.

As a member of a small team, you will have the opportunity to play a vital role in developing our software products which are used worldwide by many well-known companies.

Successful candidates would enjoy working in a variety of areas, from code development to web technologies, system testing to user interface design.

Candidates would also be given the opportunity to get involved in customer support, solving customer issues and running demonstrations for prospective new customers.

Company Background

DeltaXML produce and sell market-leading change-control and version management software for the growing XML market. Our tools find, merge, process and synchronise change to all XML data and documents and are used daily throughout the world by governments, banks, aircraft manufacturers, and the defence industry, where 100% accuracy is vital.

We are a small, friendly team with a strong work ethic for delivering quality to our customers. Candidates must be happy to contribute in team meetings, to participate in all aspects of the software development lifecycle, and to subscribe to our values.

A passion for innovation drives our work. Developers are given half a day a week to work on their own related projects and we hold regular 'FedEx days' - 24-hr prototyping projects where the development team work on new ideas to present to the rest of the company.

Desirable Skills

- ▲ Object-oriented programming e.g. Java
- ▲ Understanding of XML
- ▲ Ability to work well both on your own initiative as well as part of a team
- ▲ Proven track record of delivering on your commitments
- ▲ Ability to check own work for errors as well as the work of others
- ▲ A strong work ethic, results orientated approach, and ability to work with minimal supervision
- ▲ A 'can do' attitude, prepared to help others when necessary
- ▲ A high attention to detail

Experience Provided

Interns will be given experience in as many areas of our work as possible. There is potential involvement in the following tools and technologies: Java, XML, XSLT, Eclipse, Atlassian products (Bamboo, JIRA, Confluence, Crucible), oXygen XML Editor, Mercurial VCS, Windows/UNIX/Solaris administration, AngularJS, REST and more.

Salary

£16,000 - £18,000 p.a.

Application

To apply, please send a CV and covering letter to tristan.mitchell@deltaxml.com
