

Companies House

Digital Services - Sandwich Placement

Location: Cardiff,

Salary: £17,685

Closing date: 5th February 2018

Interviews: w/c: 26th February 2018.

Eligibility: Anyone who can demonstrate the range of skills and experience required.

Analysis Management

The Analysis Team are responsible for translating business requirements into business solutions.

In this team you will gain experience of ensuring that all system and business components seamlessly integrate to provide business solutions with the flexibility for adaptation to meet new requirements.

Liaising with teams within Companies House to ensure requirements are fully captured, and to assist in the development and assessment of design solutions for meeting those requirements.

You will work with the developers in system prototyping and assist in the definition of the system scope

Test Analysis

The Test team are responsible for testing new and existing systems including all Companies House web based services and internal systems. In this placement you will participate in all scrum activities to ensure the quality of systems.

You will gain experience in the execution of manual and automated test scenarios throughout a projects life cycle.

You will learn to track and resolve problems arising from the test process. You will aid in the creation of full documentation of the test runs and procedures for audit and regression purposes.

How to Apply

To apply please submit your CV and a personal statement to Iroddis@companieshouse.gov.uk outlining why you think you would be suitable for this placement opportunity at Companies House.

Companies House

Digital Services - Sandwich Placement

Location: Cardiff,

Salary: £17,685

Closing date: 5th February 2018

Interviews: w/c: 26th February 2018.

Eligibility: Anyone who can demonstrate the range of skills and experience required.

Main Team Role

An exciting opportunity has arisen for an innovative, highly motivated individual to join our Digital Services Team within Companies House in Cardiff.

The Sandwich Placement is for 12-14 months and will start in July/August 2018. You will have the opportunity to be at the forefront of the Government Digital transformation and to develop our services to meet the ever changing demands of the UK's business landscape.

During this year in industry you will develop skills and knowledge first hand through placements in the following areas: Website, Web Service and Internal System Development

Internal Systems

Companies House has a number of internal systems that are core to the processing and management of the information stored in the Companies House Register.

These systems are developed and maintained by teams within Companies House. The teams use a wide variety of skills and technologies such as Java, Spring, Hibernate, JSP and UNIX scripting to carry out this work.

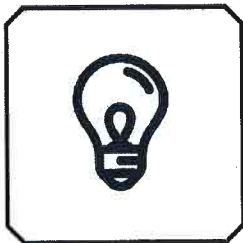

The team work very closely with the Analyst and Testing teams to ensure user requirements are incorporated and tested thoroughly before handover to support teams.

Website and Webservice Systems

The Website and Web Service Development teams develop and maintain customer facing websites to allow online searching and filing services. The developers design and develop web services to allow integration between Companies House and third party software vendors.

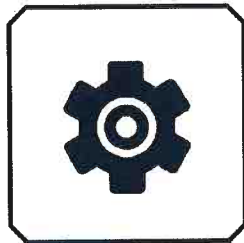

The teams work closely with the internal systems teams, analysts and other customer facing teams to ensure both business and customer requirements are represented and the solutions provided, using appropriate web technologies including REST, MongoDB.

ARE YOU THE FUTURE OF DIGITAL IN THE UK ?

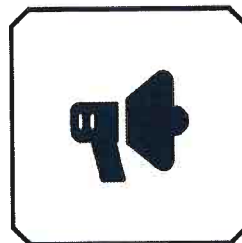

INNOVATION

We are seeking enthusiastic individuals who are innovative in their approach
