

IT Industrial Placement 2018| [more](#)

Location	Exeter HQ
Contract type	Temporary
Opening date	01-12-2017
Closing date	04-03-2018

Our Industrial Placement scheme offers ambitious, capable undergraduates the opportunity to gain valuable experience working alongside around 400 of the UK's most talented and enthusiastic IT professionals.

Why should I choose the Met Office?

As an Industrial Placement at the Met Office, you will be paid £17,000 pa and have the opportunity to spend 12 months (between June 2018 - June 2019) working with a team covering either cyber security, application development, Infrastructure or IT planning whilst developing your skills and putting what you have learnt into practice.

The IT Industrial Placement is an exciting opportunity to see first-hand what we do as well as make a real impact that the Met Office truly values. How do we show this? Well, there is the potential to return to us after obtaining your degree on our Technology Graduate scheme!

Tell me a little more about what you do....

Through world-leading science and cutting-edge technology, we collaborate to challenge the ordinary every day because we believe in the best. Working with global partners, our IT projects reach as far as Space. Around the clock, around the world, people need to know more about how the weather and climate will affect them now and in the future. Without technology, the Met Office would not be where it is today. Technology is key to every area of our work – from science and
