

Outsourced*Client*Solutions

Can you deliver the future?

Are you someone who would relish the challenge of developing game-changing artificial intelligence, robotic and computer-based solutions that will impact the lives of millions of people across the world?

The Background

We are a global facilities management company, proud of the extraordinary things our 87,000 people do for our clients, every day.

We provide services to our clients including security, catering and cleaning – vital to ‘keeping the lights on’ on a day-to-day basis. This one-year project is an opportunity to put your scientific and technological skills to the test, whilst developing business knowledge, such as stakeholder, financial and project management.

You will be either looking to undertake an ‘industry placement year’ or be a recent graduate with a relevant degree in engineering, computer science, robotics or AI.

There could be opportunities to develop a career within OCS - this might be the first step on the careers ladder.

Business and Industry Sector

This role will focus on our the ‘Business & Industry’ sector, with clients ranging from multi-national manufacturers, banking and finance institutions to utilities companies.

Our services impact the day-to-day and working lives of people across the country, from keeping our client’s employees safe and secure, fed and watered and their environments clean and tidy, our people do the extraordinary, everyday.

OCS Group

OCS Group is a family owned, global facilities management company, generating revenues in excess of £1 billion with 87,000 people around the world.

[Our History](#)

[2018 Review](#)

Our operational teams offer experience and expertise in a wide range of sectors and services. From a single service to total facilities services management, our work helps businesses to boost productivity, improve environmental footprints, enhance brand image and ultimately reduce cost whilst increasing quality.

We work in partnership with our clients, designing bespoke solutions to fit their everyday requirements and delivering the best outcomes for their customers. Our strategic partnership approach means we work as part of our clients’ teams to deliver the most efficient and effective service solutions.
