

Hiring Software Engineers

Graduates & Industrial Year Placements

Reygar is a small Bristol based marine innovation engineering company. We provide fully integrated monitoring and control systems to the marine industry. These include systems for remote fleet monitoring, dynamic positioning control systems and autonomous vessel control.

We are seeking strongly motivated individuals with a can do attitude and a strong desire to learn and grow.

From day one you will begin working on innovating projects with a real world impact. You will be supported by a mentor who will show you the ropes and help to develop your skills. As a small startup you will be able to actively contribute to company decisions and be part of an exciting adventure.

We are looking for people interested in:

- Embedded and IoT development
- Robotic vehicle control systems
- Cloud based platforms

Useful Skills:

- C/C++ and Python
- Front-end development - React, AngularJS, NodeJS etc
- Cloud Platforms - AWS, Google Cloud, Azure, etc
- Computer Vision
- Machine learning
