Are you looking for an interesting & rewarding year in Software or Web development?

Gloversure Ltd is a multi-award winning, forward-thinking, digital development company who create custom web applications, mobile apps and e-commerce systems for companies, big and small, around the UK. We are currently looking to fill Full Stack and App Industrial Year Developer positions for 2020/21 at our offices in Welshpool, Mid Wales and in Chester.

Desirable Skills:

Strong communication skills, both written and verbal

Knowledge of object orientated development practices

Experience with PHP and JavaScript ES6/ES2015 is desirable, but not required, as training will be given

Ability to work well in a team environment and organise your own workload

High attention to detail with problem solving skills

Ambition, a strong work ethic and open to new ideas

What we can offer you:

You will be granted the ability to work on various types of projects, with the flexibility to specialise in an area of your choice, this could be: native and non-native apps, DevOps, client-side (React, Ember) or backend (Laravel, Express).

We run an informal, trust-based, passionate environment to help you focus on creative solutions for our clients. The team runs a strong group feeling; we all work together to create stunning end products to fit our customer's requirements. Many previous industry placement students have completed education and become full-time members of the gloversure team- and still work with us today!

During your placement, we provide introductory courses to the various technology stacks we use, meaning you will finish your time with us empowered with additional industry knowledge.

How To apply:

Please submit your CV by email to jobs@gloversure.co.uk Please include any examples of your work which you feel demonstrates your programming capabilities.

gloversure.
