

Mobile Developer Job Specification

An exciting opportunity has arisen to add a Mobile Developer to our Aberystwyth or Bristol-based software teams with the option to work remotely. This post has a genuine opportunity for career progression as the company grows. Join us, and help move our product set into the future; transforming intelligent, life-saving reporting apps and integrating new technologies developed in collaboration with academia.

About RHE Global

RHE is a company specialising in innovative cloud software solutions for government, business and professionals. We lead the market with self-reporting apps for citizen engagement and knowledge management for the regulatory and compliance industry. Visit our website to find out more (<https://www.rheglobal.com/>).

A few of our products include:

- The Noise App (<https://www.thenoiseapp.com>)
- Reportable (<https://www.reportableapp.com>)
- RIAMS (<https://www.riams.org>)

Why we need a Mobile Developer

We are looking for a motivated Mobile Developer to help us enhance the quality of our product portfolio and bring the technology up to the latest standards. You will need to be a self-starter with the ability to take on a range of challenges from refreshing our existing sector-leading apps, to working on defining brand new products with the team.

Your responsibilities

- Design, develop and test mobile apps across iOS, Android, and React Native platforms
- Work closely with product teams (product owners, business analysts, designers and developers) to define clear product roadmaps
- Monitor app statistics and provide insights based on data to improve our products
- Be aware of current standards and ensure code quality in every contribution

Key skills

- The ability to write well-structured code and workflows with an interest in software design patterns
- Previous experience working with iOS, Android or React Native (or the keen desire to learn and to use all of these technologies daily)
- Some knowledge of database design principles and practices
- Understanding of software engineering best practices e.g. version control, clean code, tests

- Some knowledge of server technologies and infrastructure

Desirable skills

- Production experience with React Native, SwiftUI, and Android (Kotlin)
- Experience using design and wireframing tools such as Balsamiq, Sketch, Photoshop, or Illustrator and the ability to create hi-fidelity prototypes
- Previous experience in releasing successful production apps to the store
- An understanding of data synchronization and app performance
- An understanding of CI pipelines
- Experience developing complex interfaces for varying screen sizes

Other information

- Salary: £25,000-£35,000 (Junior), £35,000-£40,000 (Mid-level)
- Hours of work: 35 hours per week
- Working pattern: 9 am to 5 pm, Monday to Friday
- Location: Aberystwyth (preferably on-site or remote in the UK with the ability to attend meetings in Aberystwyth/Bristol)
- Application process:
 1. CV review
 2. Phone call
 3. Interview in Aberystwyth or Bristol and Bath Science Park

To apply, please submit your CV to jobs@rheglobal.com
