

Software Development Industrial Year Placement

Yate - Bristol (UK)
1 Year Full Time Internship
£18k + Benefits

Do you have the drive to succeed? Do you have a passion for coding, or maybe you are a logical thinker who loves to code? Are you after a yearlong industrial year placement as part of your university degree? Sound interesting... please read on!

Apak Group, a Sopra Banking Software company, are a global software company based in Yate, situated approximately 10 miles outside of Central Bristol. Apak offers its employees the chance to work on global financial products that are supported by the most exceptional minds in the industry.

About the Role

The role will give you the opportunity to push your skills and experience to the limit, creating technical solutions for Enterprise Global Banking & Finance Businesses and play your part in our expanding international operations.

On offer is the opportunity to work in our well-established software development department where you will work with leading web-based software systems developed on open architecture, using Java and Relational Databases. The product direction is targeting a SaaS microservice platform architecture based around AWS services. With this change in direction, there will be a transition from Java to other languages such as TypeScript. You will be fully supported within a team environment that has an excellent history of career progression!

Benefits

- Pension Scheme
- Employee welfare package, consisting of: BUPA, HealthAssured (Employee Assistance Programme), Life Cover and Income Protection, to name a few
- 25 days holiday + bank holidays
- Structured in-house training & tailored personal development plan
- Events and social activities
- Innovative office space with breakout areas and games room

Role Requirements

- An interest in working for the finance industry
- Grade C or above in your A-level results (or equivalent)
- You are on course to achieve a minimum of a 2:1 degree or equivalent in Computer Science, Maths, Engineering or Physical Sciences
- Experience with an object-oriented programming language

The closing date for this role is Friday 26th February.
