Graduate IAM Consultant

Remote working from anywhere in the UK

Who we are…

Since 2016, Raidiam have been solving the problems of digital identity and access management that exist at the heart of any data sharing: from client online access, workforce access (Single-Sign On and Remote Working), through to the more complex problems of data sharing across an entire ecosystem involving multiple parties (Open Banking, Open Energy, Open Data).

We provide Advisory and Delivery services to clients of all shapes and sizes globally, from Commercial organisations through to Governments and Ecosystem controllers, to help them unlock the power of the connected, digital world. We connect ideas, systems and people: to give you the trusted, secure foundation on which to build stronger and more rewarding relationships with your customers and partners.

We're a young and vibrant company based in heart of the City of London that is harnessing the potential of digital identity to power the next big things across industry globally..

About the role…

We are looking for IAM technical consultant/engineers to join our expanding team. The core engagements shall include integration of identity management solutions into a client's infrastructure, providing best in class advisory around integration approaches to reduce complexity, but maintain the goals of reaching conformity with new and existing regulatory considerations. With exposure to leading API and identity management solutions, the successful candidate will be at the fore front key regulatory programmes and advising on conformance.

Responsibilities of the role…

- Working closely with our enterprise clients and partners
- Understanding technical and business requirements (IAM, IDM, SAML, OAuth, OpenID Connect, SOAP, REST, SSO, API, Java, GO or NodeJS backend, etc.)
- Bespoke solution implementation, deployment, configuration and architecture design
- Providing technical consultancy and guidelines for integration
- Technical leadership on solution implementation projects
- Providing technical advice and guidance for on-going usage of products for clients
- Working with project managers to deliver customised solutions

The ideal candidate will have…

- Studied for a degree qualified in Computer Science/Software Engineering
- Tech savvy, with an interest in or flare for Technology and the business outcomes it enables
- Possess strong communication and writing skills with ability to create engaging content
- Have a creative mindset and be a natural problem solver
- Have a proactive attitude and ability to work independently and as part of a team
- Excellent analytical and problem-solving skills
- Strong Excel skills and be comfortable working with numbers and analysing data

- Able to work in a fast-paced environment

What you can expect from us …

- A vibrant, young and fast-paced environment supported by modern technology
- An opportunity to work alongside and learn from seasoned industry professionals
- The chance to grow and develop into a full-time permanent role
- Support to study for industry standard qualifications

Location: Work from home/Flexible working
