*“At Elanco students are a critical part of our Global IT Team, taking responsibility for real projects that directly impact our infrastructure, brands, and customer experience.”*

An exciting opportunity for an **experienced Web Developer** to join Elanco's **Global Digital IT** team as part of our Industrial Placement Program. Our team aims to deliver relevant content to the right customer at the right time, and through their preferred channel. We are leaders in Elanco's digital transformation, delivering highly visible projects with an external impact, whilst making digital easy to consume for business partners in our company.

### You Will:

- Design, Develop, Test & Deploy code packages used on all of Elanco's public facing websites
  - Work closely with Elanco's strategic partners as part of iterative development cycles
  - Work with other Digital IT team members to create proof of concepts and demonstrations
  - Implement Test Driven Development practices
  - Review Pull Requests and propose improvements to existing code
  - Provide technical guidance and expertise to other IT personnel
- Adhere to and propose new technical standards

### You Have:

- Strong experience using modern web technologies including Node.js, React and CSS
- An understanding of API Development (REST, GraphQL) and Modern Data Stores (Redis, Cosmos)
- An understanding of Cloud Architecture (e.g. Azure), SCM (e.g. GitHub) and DevOps
- A portfolio of work to demonstrate your technical ability
- A technical approach to problem solving
- The confidence and ability to operate independently with a variety of stakeholders
- An ability to plan, organise, and prioritise
- Passion to learn and grow your skills independently

### You Are:

- Enrolled in a degree program with an Industrial Placement option
- Eligible to work in the UK
- On track to receive a minimum of a 2:1 at graduation
