

NET WORLD SPORTS

Junior Web Developer – One Year Placement

Net World Sports is on an exciting journey as we strive to become the best sports equipment retailer in the world. It's a pretty bold ambition but being bold is what sums us up as a business, what stands us apart from our competitors and what has fuelled our rapid expansion.

We're looking for passionate and aspiring web developers to spend a year with our development team. If you've got talent, determination and ambition, combined with bucket loads of energy and a genuine desire for success, then you'll be in great company.

This team is at the forefront of Net World Sports, constantly researching, testing and implementing innovative solutions to offer customers the very best online experience and drive our business forwards. It's an exciting opportunity for the right person to come in and learn about our rapidly growing business and experience real ownership from day one.

You'll be helping to implementing a range of development projects and tasks, from module development to wide scale roll-outs on our Magento websites. Working alongside the design team you'll be bringing to life exciting features which will result in positive customer engagement. With all your work, you'll ensure thorough testing is carried out on all projects to guarantee effective functionality.

You'll help to find ways to improve our global Magento websites, ensuring that customers receive the very best shopping experience. We've got a few Magento sites (24 in fact!), and we're currently in the process of migrating these sites to M2, so you'll gain varied frontend and backend experience as we look to make constant improvements, optimising the user journey each time.

We are currently in the process of rolling out our first mobile app, this requires further development as time goes on to ensure it's at the very highest level. We also have a few WordPress websites that need some attention as the year progresses. There's a lot of scope for multiple avenues of development and you'll be able to focus on areas that appeal to you.

We're also building our brand new 400,000sq ft office and warehouse just down the road, due for completion in Summer 2022.

What we'd like to see from you:

You'll be able to produce clean and well documented code

You'll have the ability to work alone and as part of a team, working to meet strict deadlines

You'll be full of ideas, constantly suggesting ways that we can improve

You'll have an enthusiastic, positive attitude, and you'll thrive on a challenge

You'll be able to work independently and as part of a team, open to feedback so you can continuously improve

You'll spend time learning and developing your skill set as you're genuinely passionate about web development

NET WORLD SPORTS
