Collins Aerospace is a leader in technologically advanced and intelligent solutions for the global aerospace and defence industry. Created in 2018 by bringing together Rockwell Collins and UTC Aerospace Systems, Collins Aerospace has the capabilities, comprehensive portfolio and expertise to solve customers' toughest challenges and to meet the demands of a rapidly evolving global market.

Based at the foot of the beautiful Malvern Hills in Worcestershire, this is an opportunity to be part of a dynamic and innovative business unit that supports international and domestic customers who are 'interested to know what is happening in places they cannot be'. Our software and systems products produce meaningful intelligence from multiple data sources and present this information in an intuitive, secure and timely manner. We take the complexity out of data to empower our customers ([www.sci-toolset.com](http://www.sci-toolset.com)).

Role: Intern – Software Engineer (Aug 2023 – Jul 2024)

### Purpose of the Role:

We are seeking enthusiastic individuals who are quick to pick up new skills and keen to develop system wide knowledge, including infrastructure as well as code. If you've got experience of working in an Agile (SCRUM) environment and knowledge of web technologies then that's a bonus. If you have a technical and numerate background and love to tinker with technology, we'd love to hear from you.

We're offering the opportunity to develop your skills in Java, Kotlin, C++, Python, HTML 5, JavaScript, EmberJS, SQL databases and Machine Learning. Our work environment provides a flexible, relaxed yet productive atmosphere with a competitive salary and flexible benefits.

### Personal Qualities:

- High level of communication skills;
- Keen to develop system-wide knowledge;
- Ability to work well within a team;
- Eager to design, implement and test object orientated software on a Windows or Linux platform;
- Ability to analyse requirements and generate tests to ensure the requirements are met;
- Good problem solving and bug tracking skills;
- Self-starting and inquisitive – able to get to the root of problems and find innovative solutions;
- Quick to learn new technologies;
- Customer focussed.

*Collins Aerospace is a multi-national organisation who can provide exceptional career opportunities to exceptional individuals. If you feel that you can meet the challenge and are a UK national (we need you to obtain MOD security clearance) please apply by submitting your CV with a covering letter to [william.sherratt@collins.com](mailto:william.sherratt@collins.com).*

From time to time the successful candidate may be required by the Company to perform other tasks and/or learn new skills which are not included in the above description, but are within the capabilities of the individual and, where necessary, training will be given.
